WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US05/10391

Box No. V Reasoned statement under Rule 43 *bis*.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>2,4</u>	YES
	Claims <u>1,3,5</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-5</u>	NO
Industrial applicability (IA)	Claims <u>1-5</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1,3,5 lack novelty under PCT Article 33(2) as being anticipated by THOMS et al (column 4) or SU (example 2), both providing the instant high polymeric cellulose baits to control termites-see column .

Claims 2,4 lack an inventive step under PCT Article 33(3) as being obvious over SU or THOMS et al in view of KOHAMA et al. SU OR THOMS provide the instant baits, but do not teach briquettes. KOHAMA does, see column 3, any shape can be formed of an insecticidal bait, exemplified as tablets, suitable for wide range of insects. IT would have been obvious to utilize the particular bait shown effective for the insect of interest, termites, by THOMS or SU, in the form of a tablet, or shape as desired, shown effective by KOHAMA.

Claims 1-5 meet the criteria set out in PCT Article 33(4), and thus provide industrial applicability because the subject matter claimed can be made or used in industry.

Claims 2,4 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the briquette form of the instant bait.
